NFT-BLOCKCHAIN-PLAY 2 EARN-GAMES

INTRODUCTION

The OZI Technology is committed to provide excellence to our clients & users by meeting their needs & requirements regarding best mobile games & applications with top notch user experience. We assist our clients through our expertise in areas such as Blockchain Development, NFT marketplace, Blockchain in Gaming, Defi Marketplace, NFT Holdings, Staking, Pooling, Liquidity and many more

BLOCKCHAIN IN FARMING

We integrated ERC20 & ERC721 contracts in our farming game. The NFTs are minted on Ethereum blockchain. The data of NFTs i.e., 2d images was hosted on decentralized server as well. We have also integrated an in-game market place where users can see NFT listing, buy NFTs and Sell NFTs at different prices.

Features:

- ERC20 & ERC721 creation & in-game integration
- In-Game NFT logic building for NFTs and their interaction

RONALDO & JORDAN SHIRTS

In this project we implemented ERC721 and minted 100- 500 pieces of shirts of each player.

All shirt collections are listed in opensea

[www.opensea.iohttps://opensea.io/collection/jordannft](https://opensea.io/collection/jordannft)
<https://opensea.io/collection/rolandonft>

Features:

ERC721 upgradable

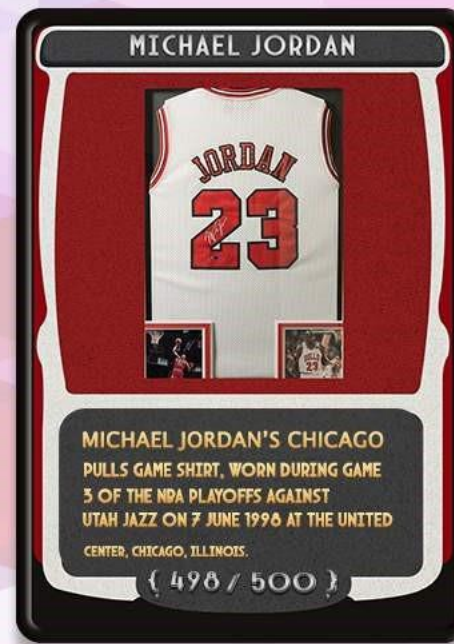

100-500 Pieces of shirt minted with its data on IPFS

C. RONALDO & M. JORDAN SHIRTS

- NFT MINTING
- CUSTOM CONTRACTS
- OWN CUSTOMER MARKET PLACE

- OPENSEA LISTING
- ASSET STORAGE ON IPFS
- 500 DIGITAL ASSET ON ETH CHAIN

BLOCKCHAIN IN MONSTER TRUCK

Monster truck is a blockchain-based Action Racing game centered around Monster derby and NFTs.

Built with Unity using the NFT Game Framework the game has an amazing in-game arenas with multiple playable trucks of different speed and capabilities.

Mint a driving license and you automatically get a NFT vehicle

All these elements are built and run on Metamask Wallet. Each function is intertwined with the blockchain.

NFT BUBBLE TREASURE

NFT Bubble Treasure is a metaverse built on the Binance Smart Chain (BSC). It uses smart contracts and blockchain technology to create an element of gamification. Every Egg will hatch a new baby Bubble and have a 4 maturity level based on every 3 months timeframe locked on Yield Farming.

Each maturity level will have different Hashrate power.

Features:

ERC20 & ERC721 Creation

Yield Farming & NFT Staking

ReactJs for frontend

NFT BUBBLE TREASURE

STAKE YOUR NFT'S AND ACHIEVE DIFFERENT MATURITY LEVEL WITH DIFFERENT HASHRATE POWER

METaverse BUILT ON BINANCE SMART CHAIN(BSC)

UPLOAD MY NFT

What is Upload my NFT?

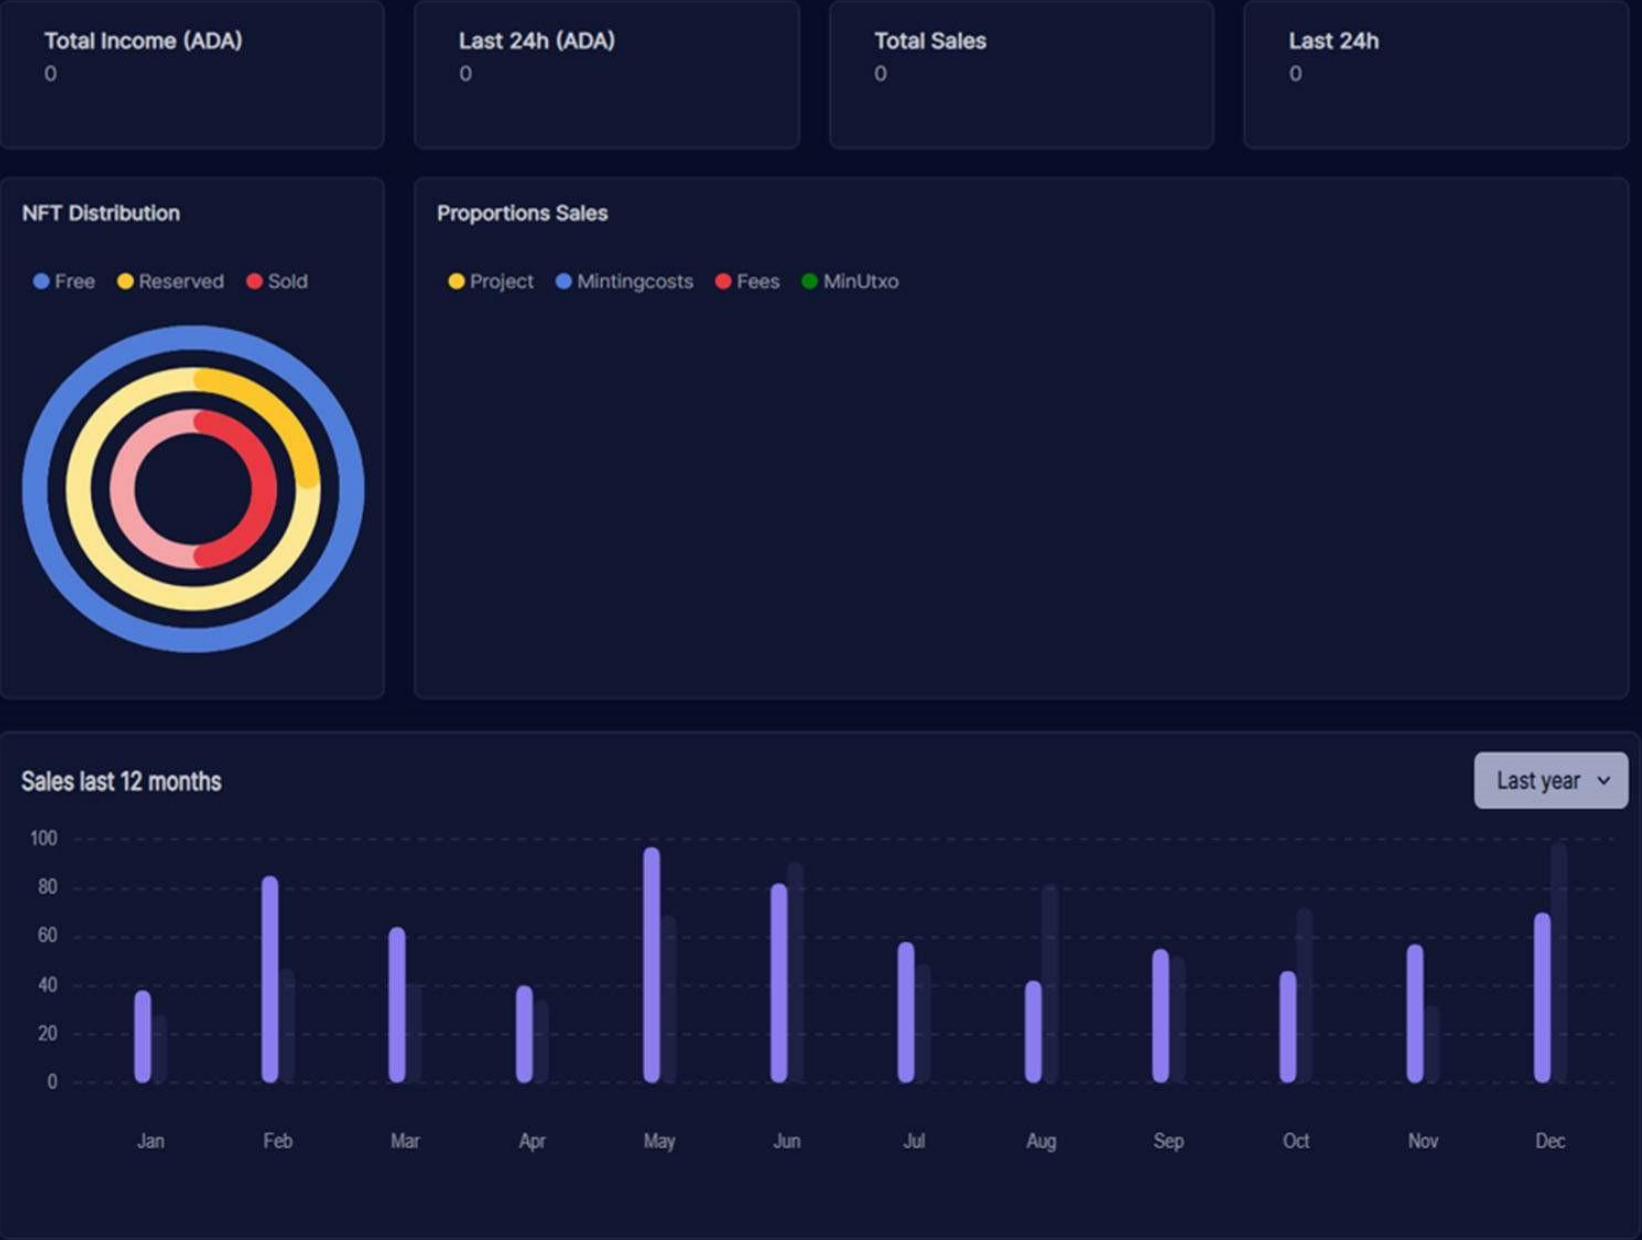

- Web app and accompanying API that enables you to create, manage, and sell NFTs at scale on the blockchain
- Built to empower large projects with a smooth sales and distribution process
- Designed for complex NFT collections and built to be integrated websites and Apps

FEATURES

- Interacting directly with the blockchain
- Scaling with a heavy load of potential buyers.
- Updating nodes time to time.
- Building an intuitive web app to help you understand business metrics.
- Interfacing with partners like IPFS.
- Mass minting and NFT management
- Dashboard
- NFT Projects
- Transaction Details

Dashboard

DASHBOARD

- How many NFTs you've sold in total and in the past 24 hours
- How much ADA your sales have generated, broken down by fees/mintings costs
- How many transactions, fees incurred, and revenue you had month to month
- How many NFTs are currently available for sale, on a reservation, or have been sold
- What were my latest 5 transactions with their accompanying transaction id
